SUMMARY

I currently work as a full stack developer with heavy emphasis on back end development. The current tech stack I use is AWS, Spring Boot, Java, Docker, and AngularJS. My primary responsibility is to refactor our existing monolithic applications using microservices. I am a dependable, self-motivated, team player dedicated to learning new ways to solve complex problems. I am looking to work for a company that offers me the ability to grow both professionally and personally.

SKILL HIGHLIGHTS

Daily Use

Agile/Scrum	MySQL	AWS	Spring Boot	JavaScript/TypeScript
RESTful API's	Microservices	NoSQL	Docker	Microsoft SQL Server
Java	Git	AngularJS	Jenkins	PostgreSQL
